

Communicating Variable Speed Blower Drive

PIB #414 | 12/6/2024

In early November 2024, Allied introduced a new indoor blower drive to our communicating variable and modulating furnaces aimed at enhancing serviceability. Currently, this impacts upflow and horizontal, only. **Catalog numbers were not impacted, but a dash (-) number change was implemented to signify the change.** The first serial numbers featuring the updated indoor blower drive are listed in the table on Page 2 of this PIB. We will update the table in this PIB as the remaining models with the new blower drive are produced.

Whereas the current communicating ECM had the module attached to the back of the motor, the new design is two-piece with the blower drive now being mounted on the blower housing next to the integrated furnace control (IFC). While this looks different, the unit performance will be the same.

Additionally, repair parts, listed below, were simplified to ½ HP, ¾ HP, and 1HP motors for all three models and 3 blower drive modules. **Please note, the new motors are not backwards compatible.**

	Motor		Blower Drive	
	Cat #	Part #	Cat #	Part #
½ HP	20U01	620617-01	24M90	620616-04
¾ HP	20U02	105793-02	27J51	105940-01
1 HP	20U03	620617-03	24K06	620616-03

Check out our [FAQ](#) document for more information on how to service these new blower motors and drives. If you have any questions, please contact Allied Technical Services at 800-515-3501.
